

100 Careers

Nobody Told You About

What they are. How to explore them. What it costs to start.

How To Use This PDF

This PDF has one job: to show you that the world of careers is much bigger than the 7 options you were told about. You don't need to read all 100. Just skim the categories. Stop when something makes you curious. That curiosity is the signal.

The 30-Day Explore Challenge

- 01** Spend 10 minutes going through this entire PDF. Circle or highlight anything that makes you think 'hmm, that sounds interesting.' Don't overthink. Just notice.
- 02** Pick your top 5. For the next 30 days, spend 30 minutes each day exploring one career from your list. Watch a video, follow someone who does this work, try a small project.
- 03** After 30 days, you'll know which 1-2 careers made you feel something. That feeling is the starting point. The destination comes after you put in your first 20 hours.

How To Read Each Entry

Each career has 4 columns: the name, what the person actually does, one specific thing you can do THIS WEEK to try it, and how much it costs to start exploring. Most are free of cost. The 'I don't have money' excuse doesn't work here.

Feeling the pull but scared of the jump?

You just saw 100 careers that most people never even hear about. Something on that list spoke to you. Maybe more than one thing. But there's a gap between knowing what exists and actually making the move.

This ebook bridges that gap. Written by Vijeta Dahiya, who quit 3 toxic jobs, left the rat race behind, and built a career around his passion. Village upbringing. Middle-class family. No connections. No safety net. He figured it out anyway.

Inside, he breaks down exactly why you feel trapped, how the system keeps you locked in, and gives you a step-by-step plan to start building your new career on weekends without quitting your day job. There's even a chapter that does the financial math for you, so you know precisely when it's safe to jump.

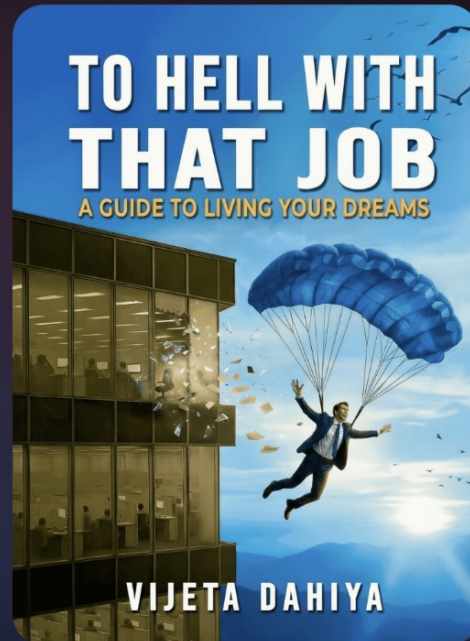

When you purchase, you get access to both the audiobook and the reading book, in both English and Hindi. The first chapter is free. Over 50,000 people have already read it. You can be next.
