

FlexClip Video Editor - Your Super Easy Beginner's Guide!

Hey, Let's Make Some Videos!

FlexClip is a website that makes video editing *super* easy, even if you've never done it before! You don't need to download anything – it all works in your browser. This guide will show you the ropes.

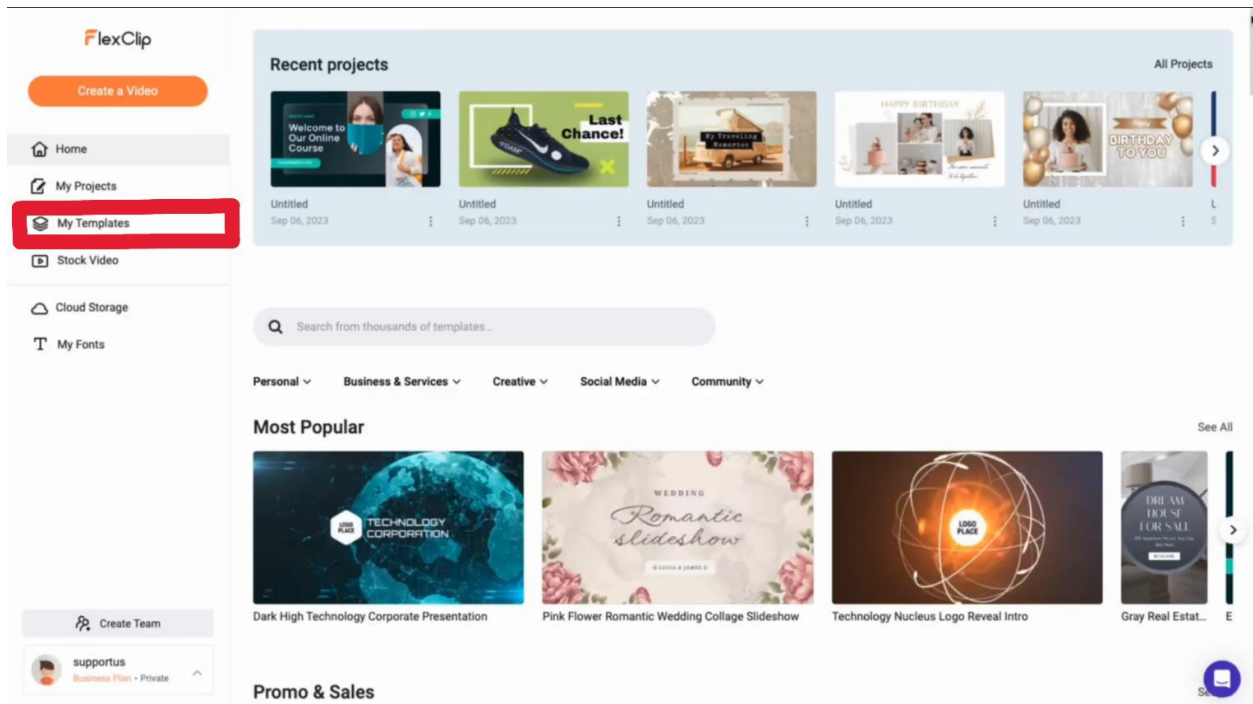

Getting Started (It's a Snap!):

1. **Make an Account:** Sign up for free, or just log in with your Facebook or Google account. Everything you do gets saved automatically, so no worries about losing your work!
2. **The Dashboard:** This is your home base. You'll see your projects and other cool stuff here.

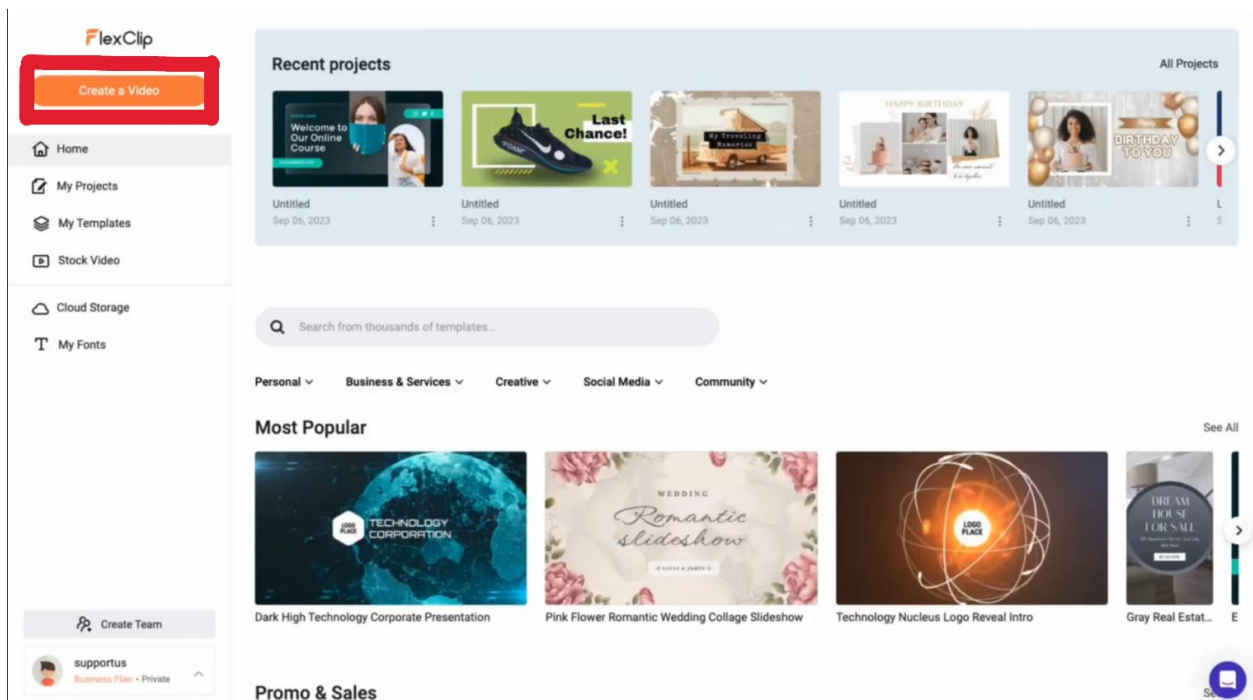

Two Ways to Start a Video:

1. **Templates (The Easy Way):** Pick a ready-made template and just change the words and pictures. Super simple!

2. **From Scratch (If You're Feeling Brave):** Start with a blank canvas and choose the size (like for YouTube, TikTok, Instagram, etc.).

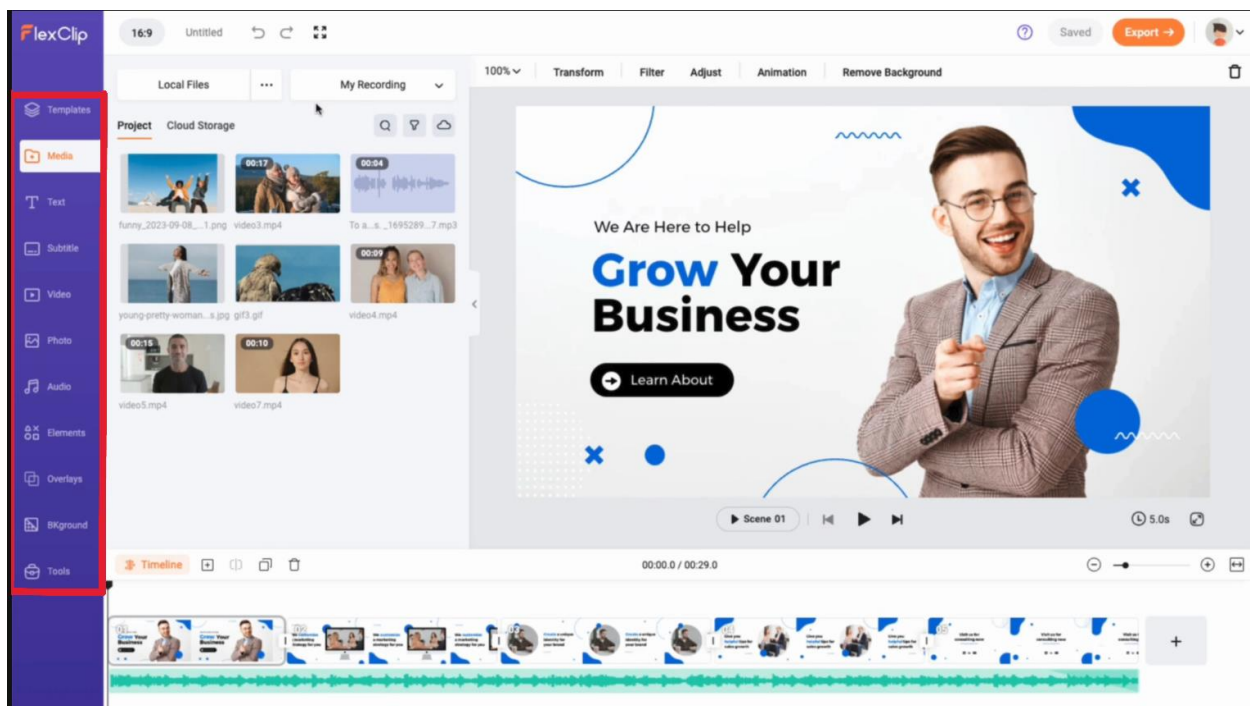

The Editing Playground:

You'll see a bunch of tools on the left and a timeline at the bottom (that's where you arrange your clips).

I. Getting Your Stuff In (Media):

1. **The "Media" Tab:** This is where all your videos, pictures, and sounds live.
2. **Adding Stuff:**
 - **Upload:** Grab files from your computer.
 - **Phone:** Add stuff from your phone (the tutorial doesn't explain this much).
 - **Record:** Record your screen, webcam, or just your voice right in FlexClip!
 - **Cloud:** Find stuff you've used in other FlexClip projects.
3. **Stock Library (Free Stuff!):** FlexClip has tons of free photos and videos you can use.
4. **Put it on the Timeline:** Just drag and drop your stuff onto the timeline, or click the little "+" button.

II. Editing Like a Pro (Even If You're Not!):

- **Make it Shorter (Trim):** Drag the ends of a clip on the timeline to cut it.
- **Chop it Up (Split):** Divide a clip into smaller pieces.
- **Turn it Around (Rotate):** Fix videos that are sideways.
- **Make it Pretty (Filters):** Add cool visual effects.
- **Fast or Slow (Speed):** Speed up or slow down your video. You can even get fancy with "speed curves"!
- **Get Rid of It (Delete):** Select a scene and hit Delete or Backspace.
- **Oops! (Undo):** Made a mistake? Click the undo button.
- **Picture-in-Picture:** Put a video or picture *on top* of another one (like a little window).

- **How Long is It? (Duration):** Drag the edges of a scene or type in the exact time you want. You can even make super short scenes (0.1 seconds) for quick cuts!
- **Zooming timeline:**
 - Drag slider for zooming timeline.
 - "Fit to screen." button.

III. The Timeline – Your Control Center:

- **"Timeline" Button:** Click this to see *everything* – videos, audio, text, all in separate tracks. It's great for getting the timing just right.

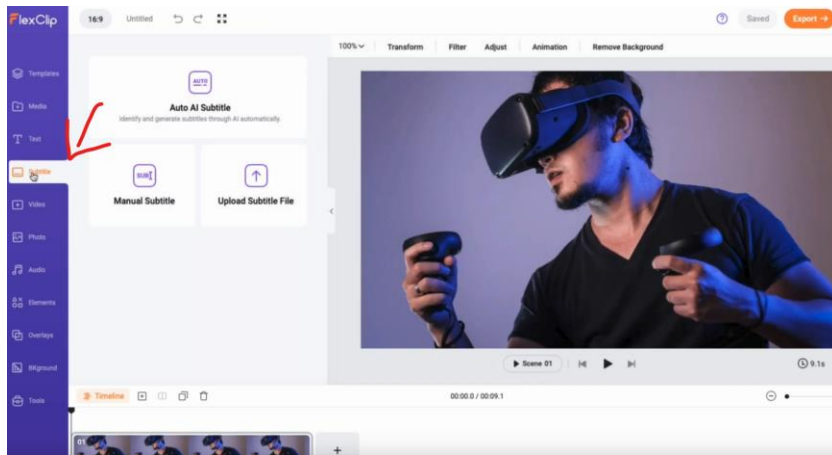

IV. Making it Awesome (Text, Music, and More!):

1. **Words on the Screen (Text):**
 - Pick from lots of cool text styles.
 - Change the font, size, color, and even how it animates.
2. **Add Some Tunes (Music):**
 - Upload your own songs.
 - Use FlexClip's free music library (no copyright worries!).
 - Add it to the timeline.
 - Change the volume, add fade-in/out, and trim it to fit.
3. **Smooth Moves (Transitions):**
 - Click the little icon *between* scenes.
 - Pick a cool transition effect to make it look professional.
4. **Extras (Overlays and Elements):**
 - Find *tons* of stuff to add, like:
 - Shapes
 - Social media icons
 - Frames
 - Emojis
 - And a whole lot more!

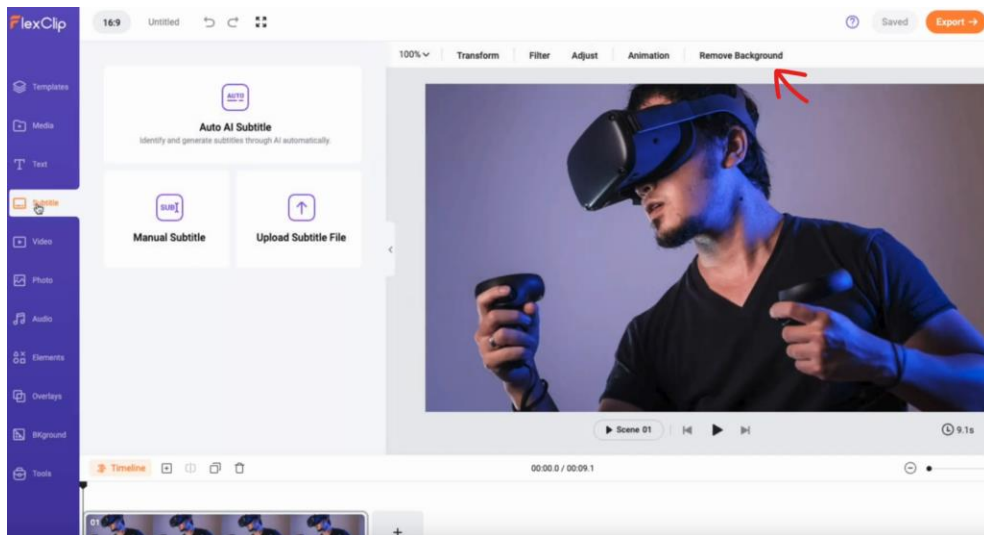

V. AI Magic (Superpowers!):

FlexClip has some amazing AI tools:

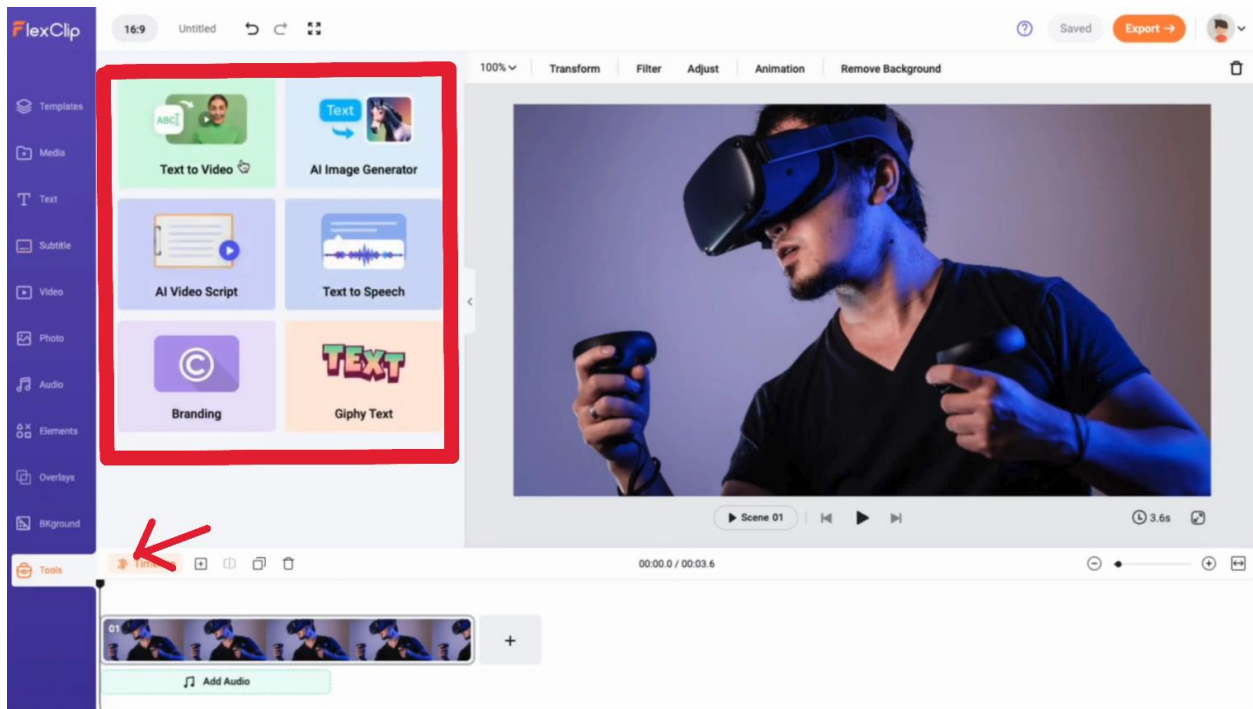

- **Automatic Subtitles:** It can create subtitles for you automatically!

- **Background Remover:** Get rid of the background in videos or pictures.

- **Text-to-Video:** Turn words into a video!
- **AI Image Generator:** Make pictures from text descriptions.
- **Video Script Generator:** Help you write scripts.
- **Text-to-Speech:** Turn text into a voiceover.

(The tutorial doesn't go into detail on these, but says there are other tutorials for them.)

VI. You're Done! (Export and Share):

1. **"Export" Button:** Click this to download your masterpiece.
2. **Sharing is Caring:**
 - Share directly to places like YouTube or TikTok.
 - Get a link to share with anyone. **Conclusion** It is a beginner friendly tool with a lot of options.

Add Audio

The image shows the FlexClip video editing interface. On the left is a vertical sidebar with menu items: Templates, Media, Text, Subtitle, Video, Photo, Audio, Elements, Overlays, and Background. The main workspace is divided into a top toolbar with options like Transform, Filter, Adjust, Animation, and Remove Background, and a central video preview window. The preview window shows a man in a VR headset. Below the preview is a timeline with a play button and a duration of 00:00.0 / 00:03.6. On the far left, a 'Tools' section contains a 'Timeline' button and an 'Add Audio' button. A red arrow points to the 'Export' button in the top right corner.
